Rajshahi, Bangladesh | Available for Remote Work | EU / US Time Zone Compatible

PROFESSIONAL SUMMARY

Senior Mobile Developer with 9+ years building Flutter and Android applications, having shipped 50+ apps used by over 1 million people worldwide. Led cross-functional teams across multiple time zones, delivered features 40% faster while sustaining 4.7+ app store ratings, and maintains an active open-source portfolio of published Flutter packages with real developer adoption. Comfortable owning a feature end-to-end — architecture, offline-first data sync, CI/CD, and API integration — in fully remote, async-first teams. Uses modern AI-assisted development tooling (Claude Code) to move faster without cutting corners on code review, testing, or architecture quality.

CORE SKILLS

Mobile Development: Flutter, native Android (Kotlin/Java), iOS/SwiftUI, cross-platform architecture

Languages: Dart, Kotlin, Java, Swift, JavaScript/TypeScript, Python

State Management: Bloc, Riverpod, Provider, GetX

Backend & Data: Firebase (Firestore, Auth, Functions, Analytics), REST APIs, GraphQL, SQLite, PostgreSQL, AWS

DevOps & Tooling: CI/CD, Fastlane, Docker, Git, Jira, Slack

AI-Augmented Development: Claude Code, GitHub Copilot — used to accelerate delivery timelines while maintaining code review, test coverage, and architecture standards

PROFESSIONAL EXPERIENCE

Senior Flutter Developer — Level III

Developer eXperience Hub (Devxhub) | 09/2023 – Present | Remote, Rajshahi, Bangladesh

- Architected enterprise FinTech and expense-management applications in Flutter/Dart serving 50K+ users, driving a 35% increase in engagement and 30% improvement in conversion.
- Led a cross-functional team of 4 developers across multiple time zones; implemented CI/CD pipelines that cut deployment time by 40%.
- Reduced crash rates by 15% through advanced state management (Bloc/Riverpod) and Firebase Analytics/Crashlytics monitoring.
- Built and published reusable Flutter packages adopted by 2,000+ developers globally, cutting cross-project development time by 25%.
- Implemented offline-first architecture with local/Firebase data synchronization, keeping apps functional through network interruptions.
- Cut app bundle size by 35% and launch time by 45% via code splitting and lazy loading.
- Integrated AI-assisted development workflows (Claude Code) into the team's process to accelerate feature delivery while preserving code review and test discipline.

Mobile App Development Trainer

National Academy for Computer Training and Research (NACTAR) | 05/2016 – Present | Remote, Bogura, Bangladesh

- Trained 200+ mobile developers with a 95% course completion rate, building curriculum aligned with Android and Flutter certification standards.
- Mentored aspiring developers with 80% successfully transitioning into professional mobile development roles.

Senior Mobile Application Developer

Prabartan Information Technology | 06/2019 – 08/2023 | Remote, Rajshahi, Bangladesh

- Led development of an EdTech platform serving 100,000+ students across 5 countries with offline-first architecture and multi-language support.

- Engineered Firebase/SQLite data synchronization achieving a 4.7-star rating while handling 100,000+ daily active users.
- Managed a team of 6 developers, introducing Jetpack Compose, SwiftUI, and Flutter 3.0 into the stack.

Android Application Developer

Blue Hills Information Technology | 07/2015 – 05/2019 | On-site, Rajshahi, Bangladesh

- Co-developed consumer applications reaching 500,000+ downloads and a top-10 ranking in the Education category on Google Play.
- Reduced app launch time by 20% and production bugs by 10% through performance profiling and code review practices.

OPEN SOURCE & TECHNICAL PORTFOLIO

Actively publishes and maintains Flutter packages and live apps, with all source code public on GitHub — used as a verifiable, hands-on body of work in place of a traditional portfolio site.

Published Packages (pub.dev): pub.dev/publishers/ehsanur.com/packages

Published Packages (pub.dev): pub.dev/publishers/devxhub.com/packages

FEATURED PROJECTS

Peace of Mind (POM) — iOS Legacy & Estate Planning App

End-of-life planning and legacy platform: digital will management, a secure biometric-locked vault, an interactive life timeline, and Apple subscription/IAP billing (individual + family plans). Resolved StoreKit subscription race conditions and led App Store submission/compliance.

Forward SMS — SMS Forwarder

Utility app that auto-forwards incoming SMS to email, Slack, Telegram, and Discord in real time, with offline queuing and custom filter rules, built and shipped end-to-end.

Tanto — Enterprise Reimbursement App

Expense-management platform for corporate users with real-time approval workflows and multi-currency support.

Muslim Times Pro — Islamic App

Prayer-time app with azan alerts, full Quran with recitation/translation, mosque locator, Qibla compass, and Hijri calendar.

Prabartan Educational Platform

Suite of learning apps (incl. Learn Python, 100K+ installs) offering structured tutorials and practical lessons.

EDUCATION

Bachelor of Science in Computer Science & Engineering

Varendra University | 05/2013 – 04/2017 | Rajshahi, Bangladesh

LANGUAGES

Bangla: Native

English: Professional working proficiency
