

# Shekh Ehsanur Rahman

Senior Flutter Engineer · Native iOS · Android · macOS

mail@ehsanur.com · ehsanur.com · linkedin.com/in/sujit70777 · github.com/sujit70777

I take on the mobile problems that block a product: offline data that must not be lost, payments that must reconcile across Apple and Stripe, platform edge cases, and slow components that need a native rewrite. 11 years shipping · 7 years of Flutter. Remote from Bangladesh · no sponsorship · works with any time zone.

## FOR RECRUITERS & HIRING MANAGERS

|              |                                                                                                |
|--------------|------------------------------------------------------------------------------------------------|
| Target roles | Senior Flutter Engineer · Senior Flutter Developer · Lead Flutter Developer · Mobile Tech Lead |
| Stack        | Flutter, Dart, Swift/SwiftUI, Kotlin, Firebase, offline-first sync, StoreKit 2 / Stripe        |
| Availability | Available now · Full-time or contract · Flexible core overlap hours                            |

## VERIFIED OUTCOMES

**~0.5 s**

Native QR / barcode scan

**100K+**

Downloads × 2 EdTech apps

**~1 mo**

2-year stall · App Store live

**10–20 min**

Releases (was ~1 hour)

## THREE PROBLEMS SOLVED

### 01 FinTech reimbursement — native scanner

Replaced a generic Flutter scanner with native Swift (iOS) and Java (Android).  
QR / barcode read in ~0.5 s; claims save offline and sync later.  
Reimbursement completes in about 5–10 seconds after a scan.

### 02 Subscription app — Stripe + Apple entitlements

Redesigned account-level entitlements so Stripe and StoreKit stay in sync.  
Ended duplicate purchases and mismatched accounts across platforms.  
After ~2 years stalled in development, approved and live in about a month.

### 03 Offline-first learning apps

Led a 6-developer team shipping Python, CSE, and ML & AI learning products.  
Firebase / SQLite sync with conflict handling for weak or no internet.  
Shipped as free + one-time Pro; two free apps each passed 100,000 downloads.

## ALSO

Hourwise — built solo as Founder & Senior Mobile Engineer; live on the Mac App Store with on-device ML for billable time.  
9 Flutter packages on pub.dev (scanner, CRDT sync, accessibility lens, and more).  
Expense and FinTech apps serving 50,000+ users; overseas team hours for three years.
